

Side-by-Side Comparison: Optical Flow vs. Eigenvalues & Eigenvectors of Gradient Difference Tensor

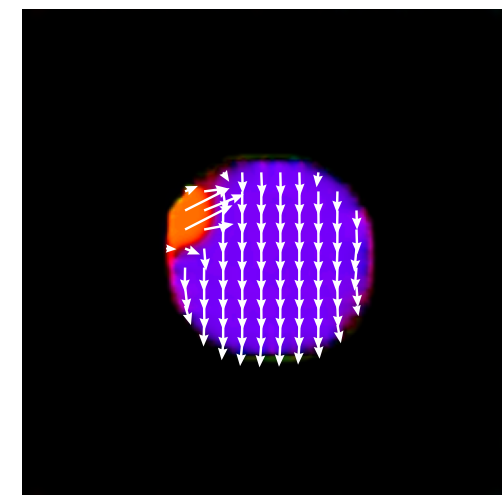

(a) Raw Difference $|I_t - I_{t-1}|$

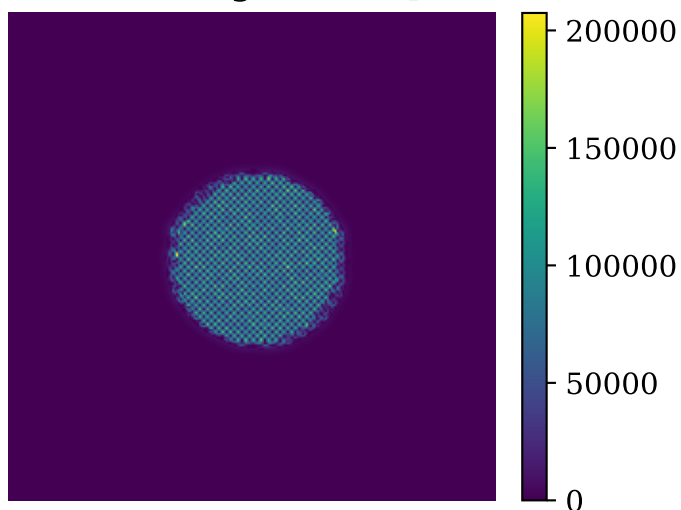

(b) Optical Flow Magnitude $\|\mathbf{v}\|$

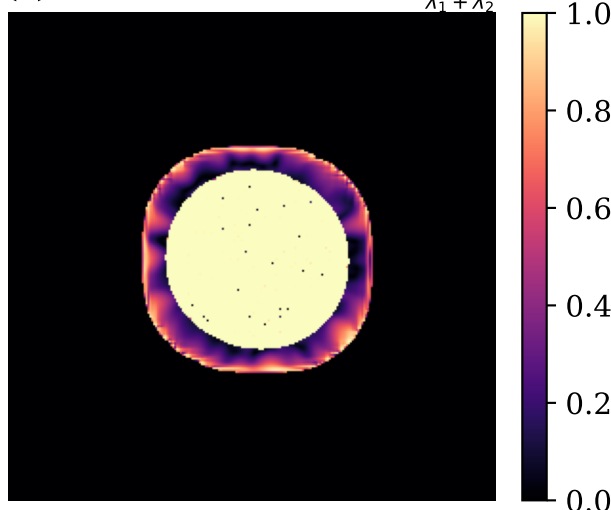

(c) Optical Flow Field (HSV + Quiver)

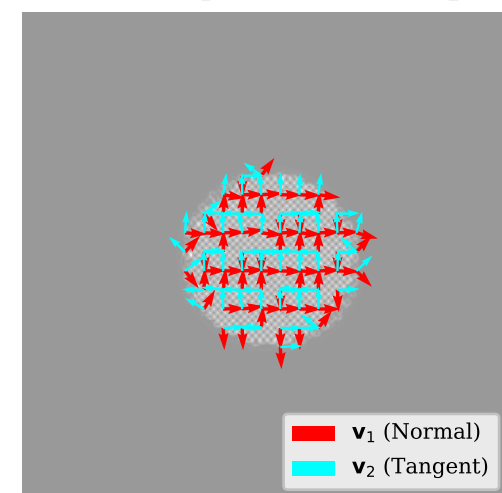

(d) Dominant Eigenvalue λ_1 (Ours)

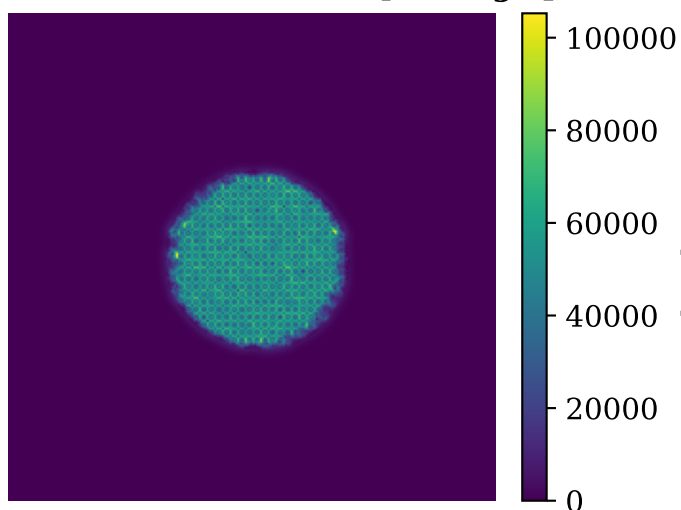

(e) Tensor Coherence $C = \frac{\lambda_1 - \lambda_2}{\lambda_1 + \lambda_2}$

(f) Eigenvectors: $\mathbf{v}_1$ (Normal) vs $\mathbf{v}_2$ (Tangent)

(g) Directional Smoothed λ_1 (Along $\mathbf{v}_2$)

(h) 1D Moving Edge Profile: Smearing Comparison at $y = 128$
